Dialogs module - Defect #591

Display of "text/text/ntextext" not working (text cutt)

12/06/2012 10:26 AM - A. Stefanoni

Status:	Closed	**Start date:**	12/06/2012
Priority:	Normal	**Due date:**	
Assignee:		**% Done:**	0%
Category:		**Estimated time:**	0.00 hour
Target version:	1.5.4		
Browser (if web client):	chrome		

Description

The following Text (cPathFilNam) is not displayed correct (Print_Screen_01075.jpg)
cPathFilNam = "C:\\servoy_61_workspace\\ProzedDbStrukturAnalyseDoku\\GigDoodle\\from\\band_fld.txt" + "\\n" + "nicht vorhanden"

As a workarround, I do a utils.stringReplace(cPathFilNam, '\\\\', ' '), then it is displayed correct (with the blank instead of \\, there is no text missing)
(Print_Screen_01074.jpg)

History

#1 - 12/06/2012 10:27 AM - A. Stefanoni

- File Print_Screen_01075.jpg added

- File Print_Screen_01074.jpg added

#2 - 12/06/2012 10:30 AM - Robert Ivens

What dialog module version is this (i.e. the component version field above) ?

#3 - 12/06/2012 10:33 AM - A. Stefanoni

I see that the browser masks the backslashes: What I mean: 'C: \\ servoy_61_workspace \\ ProzedDbStrukturAnalyseDoku \\GigDoodle \\ from \\ band_fld.txt' + '\\ n' + 'nicht vorhanden'

#4 - 12/06/2012 10:39 AM - A. Stefanoni

oh my good.... I replace the backslashes with an * ...

'C:*servoy_61_workspace*ProzedDbStrukturAnalyseDoku*GigDoodle*from*band_fld.txt' + '*n' + 'nicht vorhanden'

The Version is 1.5.2 (Sorry !)

#5 - 12/06/2012 11:14 AM - Robert Ivens

- Status changed from New to In Progress

- Component version changed from win xp to 1.5.2

I can make the message text a text_area field instead of a label. This will allow it to break off the text when it doesn't fit in the dialog.
Will implement this in next release (1.1.5 / 1.5.4)

#6 - 12/06/2012 12:02 PM - Robert Ivens

- Status changed from In Progress to Closed

#7 - 12/06/2012 12:03 PM - Robert Ivens

- Target version set to 1.5.4

#8 - 12/06/2012 12:38 PM - A. Stefanoni

this all is just incredible ! Just made a ticket a view minutes ago, just downloaded the 1.5.4 and it works perfect.
great, thank you very much !

#9 - 12/06/2012 03:01 PM - A. Stefanoni

I have a small suggestion (msgText = _aArguments [1]; insted of _aArguments [0]) on 3 last line of

function setupForm(_aArguments, _sIconStyle, _nDialogWidth, _nDialogHeight) {
.....

msgText = _aArguments [1]; // old _aArguments [0]
controller.recreateUI();

. . . . .
}

I did this in my code to make it working.

thank you and
regards

#10 - 12/06/2012 03:03 PM - A. Stefanoni

I have a small suggestion (msgText = _aArguments [1]; insted of _aArguments [0]) on 3 last line of

function setupForm(_aArguments, _sIconStyle, _nDialogWidth, _nDialogHeight) {
.....

msgText = _aArguments [1]; // old _aArguments [0]
controller.recreateUI();

I did this in my code to make it working.

#11 - 12/06/2012 05:47 PM - Robert Ivens

Thanks. I will fix this regression.
Please open a **new** issue when you find something else.
