- Status changed from New to Feedback

- Assignee changed from Sean Devlin to Ron van der burg

Well we haven't open sourced that module, so we need to do that first.

I think the best approach is to release the dialogs as part of the "utils" project and refactor it to match the standard naming conventions.

Once that is complete, then I agree it should be used in any sample implementation.

Thoughts?

#2 - 07/27/2010 10:25 PM - Ron van der burg

Agreed, I might update the dialogs module as I need it for the sample crm also.
