Description

With Java Version 1.8.0_101-b13 I get the following error while signing.

```
C:\Servoy\Servoy8\application_server\beans\dbtreeview.jar repacked
null
```

```
java.lang.reflect.InvocationTargetException
at sun.reflect.NativeMethodAccessorImpl.invoke0(Native Method)
at sun.reflect.NativeMethodAccessorImpl.invoke(Unknown Source)
at sun.reflect.DelegatingMethodAccessorImpl.invoke(Unknown Source)

Are you sure you are using the latest CodeSigner8.jar?

Matching the CodeSigner with the java version is essential.

Also do you have more than one JRE/JDK that could potentially create an issue?

Please make sure you run the correct version of Java with the related version of the CodeSigner.

#2 - 08/12/2016 07:54 AM - Anonymous

I do that with a new Windows 10 machine with.

There is only Java 1.8.0_101-b13 installed.

The codesigner tool is the newest one.

I'll give it a try with Java 8u101 maybe there's an issue there, although it's working on previous Java 8 version.

Did you try running from the command line like this:

```
java -Xms256m -Xmx1g -jar CodeSigner8.jar
```

#4 - 08/16/2016 08:47 AM - Anonymous

Yes, I do that from command line.
