

VelocityReport Plugin - Defect #1247

renderTemplate() returns NULL

08/21/2017 09:01 AM - Robert Ivens

Status:	Resolved	Start date:	08/21/2017
Priority:	Normal	Due date:	
Assignee:	Robert Ivens	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Browser (if web client):	Safari		

Description

I try to use the renderTemplate function in Developer which works correctly in SmartClient and NGClient but not in Webclient.

When I run the following command in the Command Console;

```
plugins.VelocityReport.renderTemplate("<html>test</html>", {})
```

I get a NULL back.

In the Servoy log I see the following exception:

```
java.lang.NullPointerException
    at org.apache.wicket.Session.getClientInfo(Session.java:568)
    at com.servoy.j2db.server.headlessclient.WebClient.getServerURL(WebClient.java:125)

That's a weird one. Not that it is not working in Web client, but that it would work at all in Smart and NG. :D

renderTemplate is usually expecting a template path, not the actual template content!
You could add a "fromString: true" property in the context object you're passing and this should work (telling Velocity that the String is actually the template content and not a path).
Or use evaluateWithContext() instead which is made for that...

It all actually works in 7.4.x :) Just not in 8.1.x

Anyway, I tried the following commands and they all return NULL and in the servoy log shows the same exception:

```
plugins.VelocityReport.renderTemplate("<html>test</html>", {})  
plugins.VelocityReport.renderTemplate("<html>test</html>", {fromString: true})  
  
plugins.VelocityReport.evaluateWithContext("<html>test</html>", {})  
plugins.VelocityReport.evaluateWithContext("<html>test</html>", {fromString: true})
```

Hum... I would gather that the call to getServerURL() is really to try and set a base ref URL to the xml... wonder why Session.getClientInfo() would suddenly throw a NullPointerException though.

Is that in developer or on a server? And what version of Servoy is it exactly? I'll have a deeper look asap.

#4 - 08/21/2017 11:55 PM - Robert Ivens

This is in Developer.

Version(s):

Velocity v3.5.52
Servoy version 8.1.4 -releaseNumber 3035
JVM Information
java.vm.name=Java HotSpot(TM) 64-Bit Server VM
java.version=1.8.0_141
java.vm.info=mixed mode
java.vm.vendor=Oracle Corporation
On macOS 10.12.6 (Sierra)

#6 - 08/22/2017 06:03 AM - Patrick Talbot

OK, I'll have a look asap. Thanks for the info!

#7 - 09/11/2017 06:36 PM - Patrick Talbot

- Status changed from Feedback to Resolved

Fixed in v3.5.53

#8 - 11/23/2017 12:21 PM - Koen Cloostermans

Hi Patrick,

In web client i do get this similar error

See below.

Thanks a bunch

Koen

#9 - 11/28/2017 08:27 AM - Robert Ivens

- Status changed from Resolved to Reopened

I see the same thing at Koen's environment, however I can't reproduce it on my system. Very weird.

Edit: Actually I see it too in my Servoy 8.2.1 environment. Webclient gives that error, Smart client and NG Client works fine.

#10 - 11/28/2017 04:32 PM - Patrick Talbot

- Status changed from Reopened to Feedback

I thought I had fixed this. Is there any other exception with Velocity before that one?

#11 - 11/28/2017 04:44 PM - Robert Ivens

I just did it again, ran the web client. Checked first the servoy log in servoy-admin page (running developer). Then in the command console I typed the following command:

```
plugins.VelocityReport.evaluateWithContext ("hello world", {})
```

Which returned nothing, but I did get the following output in the Console view:

```
ERROR com.servoy.j2db.util.Debug - Throwable  
at internal_anon:1
```

And in the servoy log I get the stack trace that Koen posted.
