Description			
There is a addGlobalCssReference but not one for Js, I want to use it to add fontawesome like:			
<pre>plugins.WebClientUtils.addJsReference(application.getServerURL() + '/fontawesome/js/fontawesome.min.js'); plugins.WebClientUtils.addJsReference(application.getServerURL() + '/fontawesome/js/fa-regular.min.js'); plugins.WebClientUtils.addJsReference(application.getServerURL() + '/fontawesome/js/fa-brands.min.js');</pre>			
But then global.
