

## VelocityReport Plugin - Feature #1315

### pre-check if solution is in the config.json when calling a function bound by that config file

03/22/2018 05:44 PM - Robert Ivens

#### Description

It would be great if the plugin would report back when you forget to add the solution to the config.json file. Just a simple check if the solution name is in there when your code calls a function that requires the config.json. I know this will not capture all the use-cases but at least it will beat the current 'null pointer' response for these cases :)

#### History

##### #1 - 03/22/2018 05:58 PM - Patrick Talbot

Will have a look at that shortly, thanks for reporting, Robert!

##### #2 - 03/28/2018 03:24 AM - Patrick Talbot

In v3.5.55, I've added a debug line in the log when this happens which should say that the config file or the solution couldn't be found

##### #3 - 02/28/2019 10:04 PM - Patrick Talbot

- Status changed from New to Resolved
