Category:	barcode		**Estimated time:**	0.00 hour
Target version:				
Browser (if web client):				

Description

The Velocity Plugin v3.5.53/54/55 doesn't work after the upgrade to Servoy 8.2.2 and Servoy 8.2.3.
While the Velocity Plugin v3.5.53 works fine in Servoy 8.2.1.

This is the code:

```
var barcodeDefinition = {
            data: _cod_art,
            gray: true,
            type: plugins.VelocityReport.BARCODE.CODE128,
            height: 100,

moduleWidth: "0.18mm",
            wideFactor: 3,
            format: "png",
            fontSize: 8,
            forcedWidth: 255,
            forcedHeight: 90,
            id: "barcode1",
            font: 'Arial',
            placement:'none',
            resolution: plugins.VelocityReport.REPORT.RESOLUTION_HIGH
        }

var barcod = plugins.VelocityReport.getBarcode(barcodeDefinition);
```

- File genbc.png added

- Status changed from New to Feedback

- Assignee changed from Patrick Talbot to rosamaria colombara

- Priority changed from High to Normal

Just tried in Servoy 8.2.3 with Velocity 3.5.55, with _cod_art = "Servoy Stuff" and it worked fine and produced the png attached. Perhaps you are missing the Eastwood.war in your /application_server/server/webapps/ folder?

#2 - 02/28/2019 10:04 PM - Patrick Talbot

- Status changed from Feedback to Rejected
