Target version:				
Browser (if web client):				

Description

Velocity Reports has been installed as per the servoyforge.net instructions.

The sample VelocityReport solution has been installed.

Under Problems, the only error is "NullPointerException: null", both in 7.4.8 and 8.2.3.

Component component_test.js
Path /VelocityReport/forms
Location Unknown
Type JavaScript Problem

Report folder is setup as well as the URL under Plugins on Developer.

Commenting out this line in the sample solution removed the error:

if (useCallback == 0) {
viewer = plugins.VelocityReport.previewToComponent(elements.bean_panel, template, getReportContext());
} else {
//viewer = plugins.VelocityReport.previewToComponent(elements.bean_panel, template, getReportContext(), viewerSaveCallback);
<---- This line. Callback argument creates issue.
}

Reports can be created from a modified template file.

History

#1 - 06/07/2018 02:30 PM - Patrick Talbot

- Status changed from New to Feedback

- Assignee set to Joe Collins

The sample solution hasn't really been updated to latest version of Velocity and Servoy... so it's possible there are bugs or incompatible things in there. What's for sure is that the previewToComponent() method is only working in Smart Client.

#2 - 02/28/2019 10:06 PM - Patrick Talbot

- Status changed from Feedback to Closed
