

SmartDoc Plugin - Feature #142

Provide a way to rename a document

08/28/2010 08:25 PM - Patrick Talbot

Status:	Closed	Start date:	08/28/2010
Priority:	Normal	Due date:	
Assignee:	Patrick Talbot	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	v0.7	Spent time:	5.00 hours
Browser (if web client):			
Description			
Add a 'newFileName' property in the param object used in the submit() method, to allow renaming using a user supplied name.			
The renaming would then happen in that order: 1/ use the newFileName property if provided, 2/ use the smartDocPlugin.renamingScheme of the Serverplugin to rename using MessageFormat if provided, 3/ use the original name

History

#1 - 10/11/2010 11:52 PM - Patrick Talbot

- Target version set to v0.7

#2 - 10/12/2010 12:26 AM - Patrick Talbot

- Status changed from New to In Progress

#3 - 10/12/2010 12:28 AM - Patrick Talbot

- % Done changed from 0 to 80

Still need some testing on various platforms

#4 - 10/14/2010 07:24 AM - Patrick Talbot

- Status changed from In Progress to Closed

- % Done changed from 80 to 100

Parameter newName can be used at the document level (not at the parameter object level).

The renaming do now happen in that order:

1/ use the newName property if provided,

2/ use the smartDocPlugin.renamingScheme property of the server plugin to rename using [MessageFormat](#) if provided,

3/ use the original name
