Description

Hey VeloCity-Team,

i got one big problem with the PrintReport() Function.

Situation:

If i Preview a Report it shows perfect and without problems. Convert to PDF is also perfect.

But the moment i do the PrintReport() Function, i cant change the Bordersize in the Printer Menu and, whats even worse, the print comes out really scuffed. Like in the attachment.

Everytime i try to change the border, in the printermenu, it switches back to 24,5, all 4 of the textboxes.

I tried the 10 latest versions auf VeloCity. The xhtml is also okay.

Do you guys have any idea how i can fix this? Thanks alot
