#### Description

Hi Robert!

I add some capabilities to the JSListpicker (v0.9.2) that are useful for me and I think that maybe you want to add them to your module:

\*form.editableColumns (Array with the name of the columns that you want to allow edit)

\*form.columnValuelists (Object with valuelists for the columns that need it. Must be filled like {columnName1: valuelistName1, columnName2: valuelistName2 ...})

\*callback.closeAfterNew (Boolean. If false doesn't close the form after the createNewMethod callback)

These changes allow me to create new records and edit them in the same form. They shouldn't break the behaviour of a JSListpicker v0.9.2.

Best regards.

Victor

#### History

##### #1 - 09/06/2010 12:17 PM - Victor Rojo Carballo

- File *patch\_Listpicker.txt* added

Sorry use this patch, I fixed the property name `form.columnValuelists`->`form.columnValuelists` (I missed the n after the m in column hehe)

##### #2 - 09/07/2010 09:44 PM - Robert Ivens

- Status changed from *New* to *Closed*

- % Done changed from *0* to *100*

Patch committed.

Thanks!
