<b>Description</b>			
If I create a report with formatted text (bold) as PDF this will be ignored/not displayed.			
Print and generate PDF by OS printing dialog works as expected.			
Any suggestions how to fix that?

I got it to work in Debug Client on Servoy Developer by putting the fonts.jar (created with Jaspersoft Studio) to /application\_server/plugins/servoy\_jasperreports folder.

On the production server I get currently an empty report with errors I have to investigate.
