

MultiFileUploader Plugin - Defect #1570

Error when running in Electron

07/02/2020 06:42 PM - Paul Bromwell

Status: Resolved	Start date: 07/02/2020
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version:	
Browser (if web client):	

Description

Similar issue to [#1238](#) but I'm getting a different error.

Uncaught TypeError: window.opener.location.reload is not a function

Exception is thrown in this block:

```
success: function() {  
    if (window.opener)  
        window.opener.location.reload();  
    window.close();  
}
```

History

- Status changed from New to Resolved

Check out v1.0.11 where I've secured this call.
Make sure you update the jqfu folder in your server/webapps/ROOT/

#2 - 07/10/2020 04:21 PM - Paul Bromwell

Hey Patrick!

Sorry to be a pain, but v1.0.11 is throwing the same error. I see the fix in the jqfu uploader.html file, however, the one inside the JAR doesn't have the fix.

If it helps, here's the path of the file that still has the issue: <http://localhost:8080/servoy-service/multifile/uploader.html>

Let me know if there's any more information I can provide to help assist you with this error.

#3 - 07/10/2020 05:44 PM - Patrick Talbot

Sorry, I had forgot the uploader.html file called by the plugin was the one in the jar!
I've fixed this one as well in v1.0.12, hopefully this fixes it for you, get it from the [Files section](#)
