Description

I downloaded the latest version 1.4.1 and want to use it still with an older keystore file..
That option is gone now??

- Status changed from New to Rejected

Ah! That's right. Since code signing certificates are no longer available as files, but only delivered on tokens nowadays, I removed this option and replaced it with an option to use a token.

So, if you need to sign your jars with an old certificate stored in a java keystore, please use version 1.3.8, it does the same thing as 1.4+ but with a keystore instead of a token.

I need to update the wiki to explain...
