#### Description

When used to retrieve a byte[] you should be able to use

```
byte[] = plugins.jasperPluginRMI.runReport(serverName, report, false, outputType, params);
```

However the code results to `nooutput = false` and a filename of "", then a call to `saveByteArrayToFile()` throw a `FileNotFoundException`.

Here's a patch which simply checks for filename before attempting to create the file in `saveByteArrayToFile()`.

#### History
