Description

Hi,

when I create new records and then I get a report of them, the number fields aren't showing with the numberFormat until I re-open the session (close SmartClient and open it again).

I attach a sample solution:

- Open solution in SC
- Create some new records and fill the Amount field
- Close SC and open it again.
- Create some new records and fill the Amount field
- Click the Print button and see the different format of the records created in the session.

Tested from developer, Servoy 5.2.6, VelocityReport 1.4.4, PostgreSQL 8.4

Thanks in advance.

History

#1 - 02/25/2011 02:22 PM - Patrick Talbot

- Status changed from New to In Progress
- Assignee set to Patrick Talbot

Now that's an interesting one!
Thanks for reporting and thanks for the sample: it helped!

I have found out that when records are created at first their values are stored as BigDecimal, but when retrieved the second time, they are Double!
I have added formatting on BigDecimal as well and it fixes the problem

Will publish an update soon.

#2 - 02/25/2011 02:34 PM - Patrick Talbot

- Status changed from In Progress to Closed

Fixed with v1.4.5
