<b>Target version:</b>			
<b>Browser (if web client):</b>			
<b>Description</b> If you have a subreport in a main report, when you call from Servoy, it seeks the subreport in the original path. Why it's works on developer. You can probe to create the same path in your client and put the report and subreport inside, then works fine.  I think there is a problem with the plugin, should read the path form server not the original path  Bye.			

#### History

**#1 - 04/15/2011 08:45 AM - Andrei Costache**

- Status changed from New to Closed
- Assignee set to Andrei Costache

The present issue is the duplicate of issue [#247](#).  
This is now fixed in the next release of the plugin.
