

Web Client Utils - Defect #276

plugins.WebClientUtils.addCallback problem

04/25/2011 04:25 PM - Bogdan Udrescu

Status:	Closed	Start date:	04/25/2011
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Browser (if web client):			
Description			
<p>Hi again,</p> <p>I manage to reproduce both problems in both demo solutions that I've sent.</p> <p>To reproduce addCallback problem in the last example, you only need display first the form with the javascript button. If you do not display it first, but when user press on a button or tab, addCallback will work.</p> <p>I've made this change in the attached solution by simply removing the first two tabs in the tabpane.</p> <p>Thanks, Bogdan.</p>			

History

#1 - 04/29/2011 03:11 PM - Patrick Talbot

- Status changed from Feedback to Closed

Fixed with v1.1
