

KeyListener Plugin - Feature #284

Add a "number of chars before callback" parameter to the addKeyListener method

04/27/2011 02:11 PM - Patrick Talbot

Browser (if web client):	Any		

Description

The idea being that this would give a threshold before triggering callbacks.

Some users are testing the number of chars before acting (for custom type-ahead calls for example) and they don't really need to receive any events before a certain number of chars is in the field.

- On behalf of Serge Lesouef
