Description

Hello,

i've a simple form with the Drag&Drop File Bean and i'm on a Mac and want to drop a file, which contains blanks ('example file.pdf')

The onDrop method will be fired, but there are no dropped files in the parameter.
There's an empty array instead of.

When i rename the file to 'example_file.pdf' all works fine.

There's also the same problem, when there's a blank in the path to the file.

It seems that the file path isn't escaped correctly on Mac.

Thanks,
Alex

Do you think this is related to your issue [#305](#)?

#2 - 05/24/2011 02:11 PM - Alexander Stefan

I think it's related, because it's also a Mac issue :-)
But it's not directly related.
I've tested to drag 3 files, all with names without a blank, and only the first file was dropped in the bean.
When i drag 3 files which has blanks in the file names, no files are dropped in the bean.

Thanks for your help!

- Status changed from New to Closed

Fixed with v1.2.4

#4 - 05/24/2011 03:31 PM - Alexander Stefan

Thank you for the quick fix!
All works fine now on Mac OS X! :)
