Related to Dialogs module - Defect #335: Request for a 'close' function

Resolved

06/28/2011

History

#1 - 06/28/2011 07:14 PM - Robert Ivens

Each dialog (should) get a unique name (the UUID) and when closing (onHide) it sets a cronjob with that UUID as name to destroy the dialog blueprint.

Are these dialogs opened right after each other ? Or are these errors far apart (time-wise) ?
I.e. in what sort of situation does this occur ?

#2 - 06/28/2011 07:19 PM - Robert Ivens

Nevermind, you already explained the situation in the ticket.

I will look into this.

#3 - 07/02/2011 10:24 AM - Robert Ivens

- Status changed from New to Closed

- Target version set to 1.1.2

I added some more checks in there so it wouldn't error.
