

## JSListPicker module - Defect #338

### Multiselect in two listpickers over the same table

07/01/2011 01:44 PM - Victor Rojo Carballo

<b>Status:</b>	Closed	<b>Start date:</b>	07/01/2011
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Victor Rojo Carballo	<b>% Done:</b>	0%
<b>Category:</b>		<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	1.0		
<b>Browser (if web client):</b>			
<b>Description</b>			
If you create two listpickers over the same table with the multiselect option enabled, you can not select anything when you open the 2nd listpicker.			

#### History

##### #1 - 07/01/2011 01:52 PM - Victor Rojo Carballo

- File *patch\_ListPicker.txt* added

Each listpicker has it's own dataset of selected items, but the relation to access these selected items is created checking the table name. So the second listpicker uses a relation that points to the dataset of the first listpicker.

I add a patch for create these relations with name "this.form.name + '\_' + this.form.tableName + '\_to\_selected'" to fix the multiselect in several listpickers over the same table.

##### #2 - 07/01/2011 01:57 PM - Robert Ivens

- Target version set to 1.0

Great! i will take a look at it.  
Planned for version 1.0

##### #3 - 07/04/2011 02:53 PM - Robert Ivens

- Status changed from New to Closed
