

Dialogs module - Defect #341

Icon is not shown in webclient (5.2.9)

07/06/2011 01:14 PM - Martin Heere

Status: Closed	Start date: 07/06/2011
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category:	Estimated time: 0.00 hour
Target version: 1.1.3	
Browser (if web client):	
Description	
The icons are not shown in webclient when running the demo solution (in developer)	

History

#1 - 07/06/2011 05:40 PM - Robert Ivens

- Target version changed from 1.1.2 to 1.1.3

Works for me here. Do you see the media under the mod_dialog node ?

#2 - 07/06/2011 07:46 PM - Martin Heere

Yes the media files are there. And in smartclient they are visible.

4 media files:

dialogs_icon_error.png
dialogs_icon_general.png
dialogs_icon_info.png
dialogs_icon_warning.png

I tested both IE8, Chrome and FF5

#3 - 07/06/2011 08:19 PM - Robert Ivens

- Status changed from New to Closed

I see what's going on. The stylesheet didn't come along with the export. Since one can override it I didn't link it to any of the forms so the export doesn't pick it up.

I will make it so that the default stylesheet comes with the module.

For more info on the styleclasses you can check the [wiki page](#)
