Target version:				
Browser (if web client):				

Description

Since i have installed servoy 6 i have in the warnings of my solution all the rows where i call a method from the treeview. Every method is signed as undefined in the script. What i have to do to remove these warnings ?

History

#1 - 08/09/2011 08:03 AM - Gabi Boros

- Status changed from New to Rejected

when using servoy-treeview.jar, that is the stable version, I do not
see any warnings, but I do see them when using servoy-treeview-test.jar,
that is a testing build; I guess you are using the testing build ?
