Description

Servoy Forum Reference: <http://forum.servoy.com/viewtopic.php?f=15&t=15862>

The Jasper Report Viewer and Bean have three modes for displaying reports:

Actual Page Size (100%)
Fit Entire Page
Fit Page Width

By default, 'Fit Page Width' is used thus causing users to resize the report every time it is displayed. It would be helpful to be able to programmatically specify what mode the initial display of the report should be. Our users want to see some reports fit entirely in the viewer, other reports fitting the page width, and special reports (eg. 3" x 5" index cards) as actual page size (100%).

History

#1 - 11/23/2011 12:09 PM - Andrei Costache

- Status changed from New to Closed
- Assignee set to Andrei Costache
- Client type set to Any
- In developer? set to No
- Servoy version set to 5.2.x and above
- OS version set to Windows Vista
- Java version set to 1.5, 1.6

Feature has been added.

#2 - 11/24/2011 12:47 PM - Andrei Costache

Please note that this feature has been added to the Bean, not the plugin's viewer itself.
