

## VelocityReport Plugin - Defect #359

### printing from preview doesn't work

<b>Description</b>			
Unfortunately in 1.4.15 printing from preview doesn't work. We get a NullPointerException.			
Also, you could see in the preview status bar that it states the text key "!velocity.viewer.paginatedView!" instead of the actual text, and tooltips on the buttons also have the keys instead of the text.			
Is this related to prior problems with printing due the memory management problem of iText/PDFrenderer? We don't get an OutOfMemory Exception, only the NullPointerException.
