

Busy Plugin - Defect #376

The busy cursor doesn't go away in Internet Explorer until you move the mouse

Description

This may be an Internet Explorer problem, but the busy cursor doesn't change back to the normal pointer until you move the mouse after the busy screen has cleared. This is for IE9, and the same software versions and Servoy solution that is shown in <https://www.servoyforge.net/issues/375>.

- Status changed from New to Rejected

That's definitely a IE issue and not something that can be fixed at the plugin level.
