<b>Description</b>			
Patch submitted by Patrick Rushert			
<p>[enh] added a waitTime parameter to addKeyListener: if given, the method will only fire after the user stops typing after waitTime milliseconds; for normal typing speed, 500ms is a good value; defaults to 0</p> <p>[enh] in Servoy &lt; 6 changes in a DataField were not committed yet when the method was fired; so it was not possible for example to ask for the field's current value in the method that is fired; this is worked around</p> <p>[enh] added the name of the element and the key typed as argument provided to the method called</p>			

### History

#### #1 - 12/13/2011 08:24 PM - Patrick Talbot

- Status changed from New to Closed
- Client type set to Any
- In developer? set to No
- Servoy version set to 4.1+
- OS version set to Any
- Java version set to Any

Finally integrated your patch...

Sorry for the delay, I must say I completely forgot it, now it's on.

Thanks again!
