| Description |
|---|
| Hi,<br>Use iReport **3.7.1** and plugin with **jasperreports-4.0.0.jar** -is there a better combination nowdays? From my practice migration causes side-effects, and would be interested for precise version pair(s) of iReport&ServoyPlugin that are proved to work correctly.<br><br>When generating PDF, have trouble with text fields' contents wrapping. Even if text field is width enough, the text wraps (even 1 short word breaks sometimes). Tried to change the font and tweak options: Verdana causes less wrapping but still not clean. Is there a property (net.sf.jasperreports) that can set wrapping to newer?<br><br>Issue doesn't occur from developer, but it does when generating report on Servoy as server -is there any difference? Might be set as start point in debugging.<br><br>Regards |

## History

**#1 - 11/27/2012 09:37 AM - Andrei Costache**

*- Component version set to 3.3.0 (plugin version)*

Imre, have you tried with current 3.3 version of the plugin (and iReport 4.0.0)?
Are these issues still present?

Regards,
Andrei

**#2 - 11/27/2012 10:05 AM - Imre Tokai**

*- Status changed from New to Feedback*

*- % Done changed from 0 to 100*

Thanks Andrei,
These don't occur with the latest version, so issue resolved
Regards

**#3 - 11/27/2012 11:20 AM - Andrei Costache**

*- Status changed from Feedback to Closed*

Issue resolved.
