

VelocityReport Plugin - Defect #405

callback only works when not using forms reference

01/05/2012 04:49 PM - Robert Ivens

Description

When using a callback in HTML in Servoy's HTML_AREA you can use the following syntax:

```
<a href="forms.formName.methodName()">do something</a>
```

However in Velocity this doesn't work. It will only work when you drop the forms reference:

```
<a href="formName.methodName()">do something</a>
```

Could the syntax be made to match Servoy's syntax?

History

#1 - 01/12/2012 06:20 AM - Patrick Talbot

- Status changed from New to Closed

Fixed with v1.5.10, you can now use both syntax (with or without the "forms." prefix)
