Description			
<p>I have an issue with the Zip function in the Tools plugin. I am using the latest Beta version 3.4-242. I am zipping a folder in the Servoy server folder but am having a problem with 64 bit servers. The problem seems to be down to the path to the folder to zip containing brackets, as in 'C:Program Files (x86)Servoy...' With the brackets in the path a zip file is generated but when you try to open it it is blank (see attachment). The file has a size but it is empty when you open it. After some tests this is down to the brackets in the path '(x86)' On 32 bit systems with path 'C:Program FilesServoy..' all works OK.</p> <p>[originally reported by jainr@elitecontrols.co.uk]</p>
