Servoy Treeview Bean - Feature #510

Trigger callback function when clicking header

05/16/2012 04:14 PM - Marc Boegem

Status:	Resolved		**Start date:**	05/16/2012
Priority:	Normal		**Due date:**

Target version:				
Browser (if web client):				

Description
Would it be possible to have the bean triggering a callback function when a title header is clicked? Preferable the callback function receives a column number.

History

- File servoy-treeview.jar added

Hi,

Try attached version, please
Need to extend Servoy solution in 2 places:

1. init
elements.treeview.onHeaderClick(onHeaderClick)

2. invoked function
@/**   * @param * node   * @param {Number} colIndex index of the column clicked in the header   *   *
properties={typeid:24,uuid:"CEB11B55-C167-4DF2-A7D8-2EBBCE29463D"}
*/
function onHeaderClick(node, colIndex){
application.output('Column index: '+colIndex)
}

Let us know how things are going

Regards

- Assignee set to Imre Tokai

Hi Imre,

This new function does exactly what I meant it to do. Thnkx!

There's only 1 thing: the attached version doesn't seem to be fully Servoy aware anymore, as a result I get warnings on all the bean functions.
But... it is loaded in Serclipse and I see it as an element on my form. (This was an existing reference to the beanclass used by the previous version)

Further more: the 'node' parameter doesn't seem to contain anything.

#4 - 05/18/2012 08:52 PM - Imre Tokai

- File servoy-treeview.jar added

Test attached, please
Let us know how things are going

#5 - 05/22/2012 11:41 AM - Marc Boegem

This version solved the problems of the previous.

Just curious: what is the reason the headerclick passes the node id?
This is currently always the first node

#6 - 12/30/2013 05:36 PM - Imre Tokai

- Status changed from In Progress to Resolved

Feature should be available in *servoy-treeview-experimental.jar*
If further work is needed, reopen/create case, please

Regards
