Description

If the dateString passed is '6/28/2012', the function below returns null

```
function UTIL_isDate2(dateString) {
    var result_D = null;
    if(dateString) {
        result_D = Date.parseExact(dateString, [
            'M.d.yy', 'M.d.yyyy',
            'M/d/yy', 'M/d/yyyy',
            'M-d-yy', 'M-d-yyyy',
            'M.dd.yy', 'M.dd.yyyy',
            'M/dd/yy', 'M/dd/yyyy',
            'M-dd-yy', 'M-dd-yyyy',
            'MM.d.yy', 'MM.d.yyyy',
            'MM/d/yy', 'MM/d/yyyy',
            'MM-d-yy', 'MM-d-yyyy',
            'MM.dd.yy', 'MM.dd.yyyy',
            'MM/dd/yy', 'MM/dd/yyyy',
            'MM-dd-yy', 'MM-dd-yyyy',
            'yyyy-M-d', 'yyyy-MM-d', 'yyyy-M-dd', 'yyyy-MM-dd'])
    }
    return result_D;
}
```

It seems that if the first format matches the datastring then it does work, but not when the format is second or further in the array
