Description

Hi Patrik, I've modified the busy plugin to have antialias font rendering capabilities and to accept a new "fontType" field in the object parameter, it works fine in Smart Client but not so good in Web Client: I get a 404 for .../wicketevent/wicket-event.js

As I need it urgently just for Smart Client I didn't investigate any deeper what's going on, I'm not a Java Developer but I'm sure it's a small thing, please find attached the patch.

Hope this helps, just my two cents.

Kind regards,
Juan

- Status changed from New to Closed

Pached revised and integrated in v2.2.4
fontType now working in web client as well, compatible 5.2+
