Description

Hello,
When generating a report based on SQL query that brings large resultset -all work as expected;
BUT when filling the WHERE clause of same SQL, attached error occurs **File error: data may have been lost**

Server: MSSQL, iReport and plugin engine 4.0.0.
If other versions than this can be used nowdays, advise please, as found out some unexpected behaving while ago

Any idea how to fix or similar experience?

Regards

- Assignee set to Andrei Costache

Hi,

As I understand, you are using iReport 4.0.0 and plugin version 3.3, to generate an xls report. Then you open it with Microsoft Excel, yes? What version of Microsoft Excel are you using?

Regards,
Andrei

#2 - 09/13/2012 03:26 PM - Imre Tokai

Thank you for your response Andrei,

Version: 2003, SP3, part of Office Edition 2003
Work-flow is assumed properly

Any better, newer combination of plugin+iReport(+Excel)? Advise, please.
Any further idea?

Regards

This could be a POI library issue (in relation to excel); but i am not 100% sure.

Could you please try with a Servoy 6.0.7 and 4.0b1 version of the jasperreports plugin (in this case you can use iReport 4.6.0 for report creation/editing)?

Also, when you generate the report with the plugin, are there any errors in the log? (i suppose your workflow is: create a report in ireport and the runReport on the report jrxml(?), then open the resulted xls in ms excel)

Regards,
Andrei

Thanks Andrei,

Set up dedicated playground according to your guidelines regarding tools versioning: found out that (complex) query brings empty resultset.
BUT why above warning is there? It prevents printing sections like Title, and brings nothing but an empty sheet.
So it's still there even when upgraded to new version.
No errors in servoy-admin
Note: compiled .jrxml with iReport 4.7.0

Regards

#5 - 09/14/2012 01:48 PM - Andrei Costache

Hi Imre,

Do you use a .jasper file to provide for the runReport call?
Could you use just a '.jrxml' or also a '.jasper' file, but created/compiled using **iReport 4.6.0**.

If the problem still persists, please attach a small sample solution (with sample data if needed) and a report, that demonstrates the problem.

Regards,
Andrei

#6 - 11/27/2012 09:34 AM - Andrei Costache

- Status changed from New to Feedback

Hi Imre,

Please reopen/update case providing the requested feedback when possible.

Regards,
Andrei

#7 - 11/27/2012 04:03 PM - Imre Tokai

- File reportProperties.jpg added

Thanks Andrei,
In report properties *When No Data* set *Blank Page*, see attached please. Warning doesn't appear anymore with this setup.

Regards

#8 - 11/27/2012 05:01 PM - Andrei Costache

- Status changed from Feedback to Closed

- % Done changed from 0 to 100

Marking this as closed; the problem is eliminated using the workaround suggested by Imre.
