

Dialogs module - Defect #562

Form in Dialog does not appear to work

10/14/2012 11:58 PM - Tom Parry

Status:	Closed	Start date:	10/14/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%

Target version:			
Browser (if web client):	any		
Description The replacement for the plugins.dialogs.xxx appear to work fine. I am trying to use form in dialog in both smart and web client using same code. The form that I have is already defined using the Servoy developer. I pass the form name to the scopes.globals.DIALOGS.showFormInModalDialog(...) bit it gives an error saying form already exists and then an exception raised when attempting to do form.setupForm(...). I found the cause and fixed in my copy. Basically the existing form was not extended properly due to naming issues. Has anyone had this issue? I can also check out the trunk and make a patch if anyone is interested.

Hi Tom,
I just hit the same issue. Could you submit a patch so that I can test it and integrate?
Thanks,
-Patrick

#2 - 11/20/2012 05:21 AM - Tom Parry

- File patch_mod_dialog_module.txt added

I have attached the patch that I made. I know it all works well in Smart client. Not sure if I fully tested or checked in web client. The changes I made may have to be applied for the web client case. There were some changes made to the trunk after I took my copy a month ago so I hope that it integrates ok.

#3 - 11/20/2012 05:48 AM - Patrick Talbot

Thanks Tom!
I will have a look, test on Smart and Web and integrate asap.

#4 - 11/20/2012 04:32 PM - Patrick Talbot

- Status changed from New to Closed

Patch integrated in v1.5.2 - fix for Web client added as well.

#5 - 11/20/2012 07:16 PM - Tom Parry

Great!
I will go and use this super new version in my app. I hope the web client changes were straight forward.
