Description
Fitnesse tables could load Servoy methods to do Acceptance testing, driven from Wiki pages tables. If we link tables with Rhino, we could create a special Servoy-Aware DSL.   Investigate Slim engine, and if Fitnesse could actually be deployed directly in Servoy's Tomcat.   Alternatively, invoking the FIT framework directly from Servoy methods (using Rhino or a plugin) could be cool too, creating an Acceptance test solution out of it, to validate SUT
