Description

Hi, in Servoy 6.0.8 we have call like this:

```
plugins.jasperPluginRMI.runReport(vDbalias, vPath, vOutputFile, OUTPUT_FORMAT.PDF, vParameters)
```

in 6.1.3 we get a warning that OUTPUT_FORMAT.PDF is depricated.

So we change this into:

```
plugins.jasperPluginRMI.runReport(vDbalias, vPath, vOutputFile, plugins.jasperPluginRMI.OUTPUT_FORMAT.PDF, vParameters)
```

but now the waring changes in: the property PDF is undefined.....

History

Is this a Servoy issue? or a plugin issue?

#2 - 11/20/2012 11:55 AM - Andrei Costache

- Status changed from New to Rejected

Harjo, this is not a plugin issue.

It seems a Servoy problem; it will be looked at.
