### Description

i'm having trouble with a report I want to open from Servoy. The report is OK inside iReport

When I want to open it I get this error:

```
cannot assign instance of net.sf.jasperreports.engine.base.JRBaseStaticText to field
net.sf.jasperreports.engine.base.JRBaseParagraph.paragraphContainer of type net.sf.jasperreports.engine.JRParagraphContainer in
instance of net.sf.jasperreports.engine.base.JRBaseParagraph
Wrapped java.lang.Exception: cannot assign instance of net.sf.jasperreports.engine.base.JRBaseStaticText to field
net.sf.jasperreports.engine.base.JRBaseParagraph.paragraphContainer of type net.sf.jasperreports.engine.JRParagraphContainer in
instance of net.sf.jasperreports.engine.base.JRBaseParagraph (C:\\\\Documents and
Settings\\\\JoSe\\\\servoy_workspace6b\\\\turnos\\\\forms\\\\turnos_dia.js#25)
at C:\\\\Documents and Settings\\\\JoSe\\\\servoy_workspace6b\\\\turnos\\\\forms\\\\turnos_dia.js:25 (genera_informe)
Does anyone know what this could be?
```

Attaching the report with its subreport.

Thanks,  
Andres

Hi Andres,  
Could you please attach a sample solution, or post the code you use when running the report, and maybe a create db sql also?  
Regards,  
Andrei

#### #3 - 11/27/2012 09:23 AM - Andrei Costache

I have tried to compile your reports with iReport 4.6 and all seemed fine; also i ran them, with the 4.0b1 version of the plugin (modified the reports a bit to suite my database, as i do not have yours) and it seemed fine.

Maybe if you provide a sample as requested above, we can test more, to see what the problem is.

Can you also try with a clean (new) install of the plugin (to make sure you don't have some older libraries in there that are not in sync - some related fixes on the web, related to jasperreports, suggest "not-in-sync" library problems may be the root cause).

Regards,  
Andrei

#### #4 - 11/28/2012 05:09 PM - Andres Achiary

Andrei, tried downloading the basic version of the jasper plugin and got the same error.

The sentence called from servoy is:

```
plugins.jasperPluginRMI.relativeReportsDirectory="E:/reportes/turnos"
```

```
plugins.jasperPluginRMI.runReport("turnos","./turnosdia.jrxml",
null,plugins.jasperPluginRMI.OUTPUT_FORMAT.VIEW,{fechaturno:f_fechaturno,nro_prestador:f_prestador})
```

where f\_fechaturno and f\_prestador are form variables.

Please let me know if you need anything else

The SQL for the tables are:

- Table: admi0001

-- DROP TABLE admi0001;

```
CREATE TABLE admi0001
(
prestador numeric(8,0) NOT NULL,
fechatur timestamp with time zone NOT NULL,

**#5 - 12/12/2012 04:00 PM - Andrei Costache**

Andres, please do note that you cannot use absolute path setting like `plugins.jasperPluginRMI.relativeReportsDirectory="E:/reportes/turnos"` with the plugin anymore. Please set the absolute path for the report directory in the admin page and, if needed, on the client, set paths that are relative to your admin page setting.

**#6 - 12/12/2012 04:16 PM - Andrei Costache**

Can you provide some examples for `f_fechaturno` and `f_prestador`?  
I provided no params (so a simpler scenario) and got an empty report (no pages), but no error. Could you try the same maybe?

Regards,  
Andrei

**#7 - 12/24/2012 03:09 PM - Andrei Costache**

- Status changed from *In Progress* to *Feedback*

Hi! Any updates?

Regards,  
Andrei

**#8 - 03/11/2013 08:55 AM - Andrei Costache**

Hi,

Is this problem still present; any updates regarding what has been asked previously?

Regards,  
Andrei

**#9 - 03/11/2013 09:46 AM - Andrei Costache**

*- Status changed from Feedback to Closed*

If the issue is still present please reopen providing more details if possible, as requested.

Regards,  
Andrei
