Description
First of all, thank you for this great module!!
I'm busy styling the thing, but I can't figure out, how to style the buttons? like font, font-size, front/back-color, default height?

Did you try something like this yet in your custom CSS ?

```
.formpart button.button
{
    font-size: 12px;
    background-color: #6666ff;
    padding: 5px 15px 5px 15px;
    color: #ffffff;
    border: 1px solid #0000ff;
    border-radius: 5px;
}
```

Hi Robert,

is .formpart also really the name of the forms that are used in this module?
and have the buttons, already a style: button?
I do not fully understand how to implement this,

Hi Robert,

we are still strugling with this.
can you please reply?
