Description

Hi,
i'm using Servoy 5.2.15 with Velocity v3.0RC5 on a Windows 7 x64 machine with Java 1.6.0_38 (32bit).

When i've a modal dialog and want to use the Velocity Viewer with the call `plugins.VelocityReport.previewReport()`, the viewer window opens in the background and can't be reached.
To show the viewer, you have to close your modal dialog, which isn't the same behaviour like in Version 1.4.16 i use at the moment. (I know it's very old ;-))

This can be reproduced with your Demo Solution (VelocityReport.servoy).
Just click "Test in modal FID" -> "Test Viewer".

Can you please fix this issue to get the old behaviour back?

Thanks a lot!
Alex

History
