Description			
FIMD closes even when false returned from onHide event			

History

#1 - 12/26/2012 10:38 PM - Adrian McGilly

- Status changed from New to Feedback

Just to clarify: the problem I am having is that I need to validate the data entered into the FIMD and I rely on returning false from onHide to prevent the user from closing the dialog if they have entered invalid data. If there is some other way of achieving this then I'm open to trying something else.
