Description			
<p>It results in error while downloading Servoy SmartClient with message saying that the application is signed with different certificates. JasperReports jnlp uses three .jar files located in application_server\lib which in the latest Servoy build are signed with new certificate.</p> <p>A new JasperReports Plugin release for Servoy 6.1.4 is needed with at least one of the following:</p> <ol style="list-style-type: none">1. Signed with the same certificate as Servoy .jar files are signed;2. With a new .jnlp descriptor that does not share anymore .jar files with Servoy. <p>Workarounds:</p> <ul style="list-style-type: none">- Sign all .jar files with own certificate including Servoy provided .jar files or- Modify Jasper .jnlp descriptor in a way to separate the .jar files from the application_server\lib			

History

#1 - 02/15/2013 10:59 AM - Andrei Costache

- Status changed from New to Closed
- Assignee set to Andrei Costache
- % Done changed from 0 to 100

Created and uploaded new plugin builds (for both versions: 3.3.x and trunk/4.0.0) signed with the same certificate as Servoy and its libraries.
