

VelocityReport Plugin - Defect #633

Number format not rendering correctly

02/13/2013 10:56 AM - Gordon McLean

Status:	Closed	Start date:	02/13/2013
Priority:	Urgent	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Browser (if web client):	Chrome/Safari		

Description

The formatting of numbers truncates numbers when thousands with commas and decimal places are required. As an example:

```
//Servoy Object
```

```
var context = {}
```

```
context.numberFormat = '#,###.00';
```

```
context.mynumber = 17388.801
```

```
//html template
```

```
<td align="right" class="result">$!number.format($!numberFormat,$!mynumber)</td>
```

```
//template displays
```

```
17.00 however with formatting removed correctly returns 17388.801
```

Additionally inserting the Servoy currency key (`##,###.00`) \$ are added to uk browsers and there appears to be no way to switch this to £.

Note this has been tested on both OSX Developer and Linux Ubuntu 12.04 on server. Clients tested are Mac OSX 10.8.2 and Windows 8

- Status changed from New to Closed

I believe we've found a workaround for this, so I'm closing it for now.
