Description

Could you please add the jackson's library that seems to be necessary for subqueries and table component since Jasper 4.6

jackson-core-asl

jackson-mapper-asl

They are present in Ireport libs but not in the servoy plugin

Like for the charts you can create your report and test it in ireport, but can't run it from servoy

They could be of course included only in the full chart signed version of the plugin to preserve basic plugin size

History

#1 - 05/02/2013 04:41 PM - Andrei Costache

- Status changed from New to Closed

- Assignee set to Andrei Costache

- % Done changed from 0 to 100

Fixed; the jackson libs will be part of the chart and script plugin drop-in.

This will be available with the next public release of the 4.0.0 version of the plugin.

Regards,
Andrei
