

## VelocityReport Plugin - Defect #670

### .previewToComponent parameter types

03/22/2013 01:18 PM - Marc Boegem

<b>Status:</b>	Rejected	<b>Start date:</b>	03/22/2013
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>	Patrick Talbot	<b>% Done:</b>	0%
<b>Category:</b>	eclipse	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Browser (if web client):</b>			
<b>Description</b>  .previewToComponent is expecting a JComponent type parameter while in fact the element is of type JPanel. This will generate a buildmarker.  Trying to get Servoy think it's a JComponent fail as the type JComponent is unknown by Servoy (so will show a buildmarker on the JSDoc)			

### History

#### #1 - 03/22/2013 01:41 PM - Patrick Talbot

- Status changed from New to Rejected

This is Servoy'S DLTK parser being dumb again: a JPanel IS a subclass of JComponent!

I will not make it so that it has to be a JPanel, because you could potentially use any JComponent subclass, and I've used it with JLabel for example and I don't see why I should restrict the type because the parser is too dumb to see that a JLabel or a JPanel can all be casted to JComponent.

So this is NOT a VelocityReport defect but a Servoy one, please open a request on Servoy support and I'll vote for it!
