

Alternative CSS for webclient - Defect #680

The selected menu item shifts the whole menu down a couple of pixels causing some jitter.

Target version:			
Browser (if web client):			
Description			
<p>We create our menu items using the standard <code>plugins.window.createPopupMenu()</code> and when we hover over the menu items the one we're hovering over is slightly taller than the other menu items causing some jitter in the menu as we move the mouse down the menu items. Could this be fixed or was this intentional?</p> <p>Thanks!</p>

Will look into this this week

#2 - 04/22/2013 12:54 AM - Corey Puffalt

Hi, just wondering if this is still on your list to take a look at? Thanks!

#3 - 04/22/2013 05:08 PM - Harjo Kompagnie

yes, I looked at it, and it wasn't easy to fix, I have given it to a colleague of mine, will ask him.
Will let you know, asap
