

VelocityReport Plugin - Defect #695

print settings not transported to printer

06/03/2013 02:53 PM - Jos de Bruijn

Status:	Closed	Start date:	06/03/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Browser (if web client):			
Description			
I've modified the @page settings to use:			
<pre><style type="text/css" media="print"> @page { size: A4 landscape; } </style></pre>			
When I show this in the preview component (smartclient) then it shows the data in landscape mode. But when I press the print button the page properties are set to portrait.			

History

#1 - 06/03/2013 03:42 PM - Patrick Talbot

Always match the printParams properties with the @page setting:

```
var orientationType = 'landscape'; || 'portrait'
var orientation;
if (orientationType == 'landscape') {
    orientation = plugins.VelocityReport.PRINTORIENTATION.LANDSCAPE;
} else {
    orientation = plugins.VelocityReport.PRINTORIENTATION.PORTRAIT;
}
var params = {showDialog: false, size: plugins.VelocityReport.PRINTSIZE.ISO_A4, orientation: orientation};

// if you want to print from the viewer, set this as a defaultReportParameter:
plugins.VelocityReport.addDefaultReportParameter('printParams', params);

// if you are printing from Servoy, do:
plugins.VelocityReport.printReport(yourTemplate, context, params);
```

#2 - 06/03/2013 10:41 PM - Patrick Talbot

- Status changed from New to In Progress

Let me know if adding printParams work in your case, if so I'll close the bug, if not, I'll investigate further...

#3 - 07/31/2013 09:40 PM - Patrick Talbot

- Status changed from In Progress to Closed

No news is good news I suppose... so I'll close the bug. If you experience this issue after using printParams, feel free to reopen with steps to reproduce
