Servoy JasperReports Plugin - Defect #696

WebClient compilation errors if the scripting language of the report is Groovy

06/07/2013 10:59 AM - Andrei Costache

Status:	Closed		**Start date:**	06/07/2013
Priority:	Urgent		**Due date:**	
Assignee:	Andrei Costache		**% Done:**	100%
Category:			**Estimated time:**	0.00 hour
Target version:				
Browser (if web client):				

Description

The most straightforward way to reproduce is if you start the Developer's WebClient and you call runReport you get compilation errors, similar to https://www.servoyforge.net/issues/416.
Apparently if you start smart client first (and after a couple of runReport runs), web client works ok.

The current workaround for this is to compile the report/subreport files with the plugin's compileReport function before the runReport call.

History

#1 - 06/07/2013 03:45 PM - Andrei Costache

(this problem occurs only for foundset based reports and web client started from developer/appserver and for sql based reports and web clients started from the appserver)

#2 - 07/12/2013 10:04 AM - Andrei Costache

- *Status changed from New to Closed*

- *Assignee set to Andrei Costache*

- *% Done changed from 0 to 100*

The best practice here is to use Java as scripting language.
The wiki has been updated accordingly (Foundset_Based_Reports_Guidelines).
