

VelocityReport Plugin - Defect #704

\$baseHREF returns wrong URL

07/08/2013 08:27 PM - Robert Ivens

Status:	Parked	Start date:	07/08/2013
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	overall	Estimated time:	0.00 hour
Target version:	v3.0		
Browser (if web client):			

Description

My velocityreport.serverURL property is set to "http://localhost:8080/"
But when I use \$baseHREF in my template I get the following HTML:

```
<base href="http://localhost:8080/eastwood/reports/" />
```

This is even after a restart.

History

#1 - 07/15/2013 08:54 PM - Patrick Talbot

- Status changed from New to In Progress

Sorry if I misled you but this is the correct URL that \$baseHREF is supposed to use, this is primarily used for charts using the eastwood engine. Will see if I can normalize that so that charts use a full URL and \$baseHREF can be used for other purpose.

#2 - 02/28/2019 09:57 PM - Patrick Talbot

- Status changed from In Progress to Parked
